- Gate Operators
- Telephone Entry Systems

## how LiftMaster opens doors for you

Whether you design gated communities, private residences or businesses, you work to create access points that offer style, convenience and safety. LiftMaster delivers the products your clients will appreciate—and makes them easy to specify with a complete library of CAD/BIM product renderings. Plus, you can count on 100 percent compliance with UL325 2010 safety codes. In fact, as the preferred choice among dealers, LiftMaster is proud to have earned the industry's largest installing dealer network.

## flexible, creative residential solutions

You need the creative freedom to offer your clients unique designs that fit their individual lifestyles and tastes. This may require an impressive heavy entrance door or a convenient getaway above the garage. LiftMaster provides the variety of horsepower levels and drive systems that fit a wide range of applications that invite unique solutions along with accessories to add to the comfort/convenient lifestyle.

## power and reliability for commercial clients

Door openers at commercial sites require a higher level of strength and durability to endure high-frequency use—and meet applicable codes. With this in mind, LiftMaster has developed a full line of openers that are exceptionally strong and sturdy with an advanced feature set. In addition, most of LiftMaster's commercial openers meet strict UL325 2010 standards, which is critical for compliance with state and local building codes. It's everything your commercial clients expect from the leading brand of professionally installed door openers.

LiftMaster meets all the UL325 2010 code compliances.

# how to specify

When specifying a LiftMaster® Commercial Door Opener, 3 selections must be made to ensure safety and efficiency:

Step 1: Select proper model type

Step 2: Select horsepower rating

Step 3: Select voltage, phase and frequency

	●	24 & 22 ga. Steel	20 ga. Steel	16 ga. Steel	●
Standard Sectional	Fiberglass	Aluminum Doors	Wood Doors	●	●
	●	●	24 ga. Steel w/Insul.	20 ga. Steel w/Insul.	16 ga. Steel w/Insul.
1/3 HP	310	285	260	175	125
1/2 HP	400	350	320	250	200
3/4 HP	560	500	450	325	275
1 HP	640	625	560	400	310

<b>Special Application</b>	APT	●	●	●

## the first stop for quality gate operation

Simply the best name in the industry, LiftMaster has a superb reputation for quality and dependability among architects. The complete line of swing, slide and barrier gate operators is designed to meet or exceed UL325 safety standards and requirements—and award-winning designs complement any gated entrance.

CSW200

SL3000

Special features, such as synchronized operation of barrier gate operators with slide or swing gates, provide the highest level of security, anti-tailgating functionality and smooth traffic control. Heavy-duty slide, swing and barrier gate operators easily accommodate continuous operation, high security and gate applications weighing up to 5,000 pounds. Product details: Emergency Access Compliant, High-Cycle Operation, Battery Backup, Solar Panel Operation and compliant with all Access Control Systems on-site.

From a simple home design to complex, heavy-duty applications for airports, military bases or parking garages, LiftMaster offers the styles and variety that allow you to create plans that are not only well-designed, but also remarkably practical.

All LiftMaster® gate operators are available with UL325 2010 compliant options.

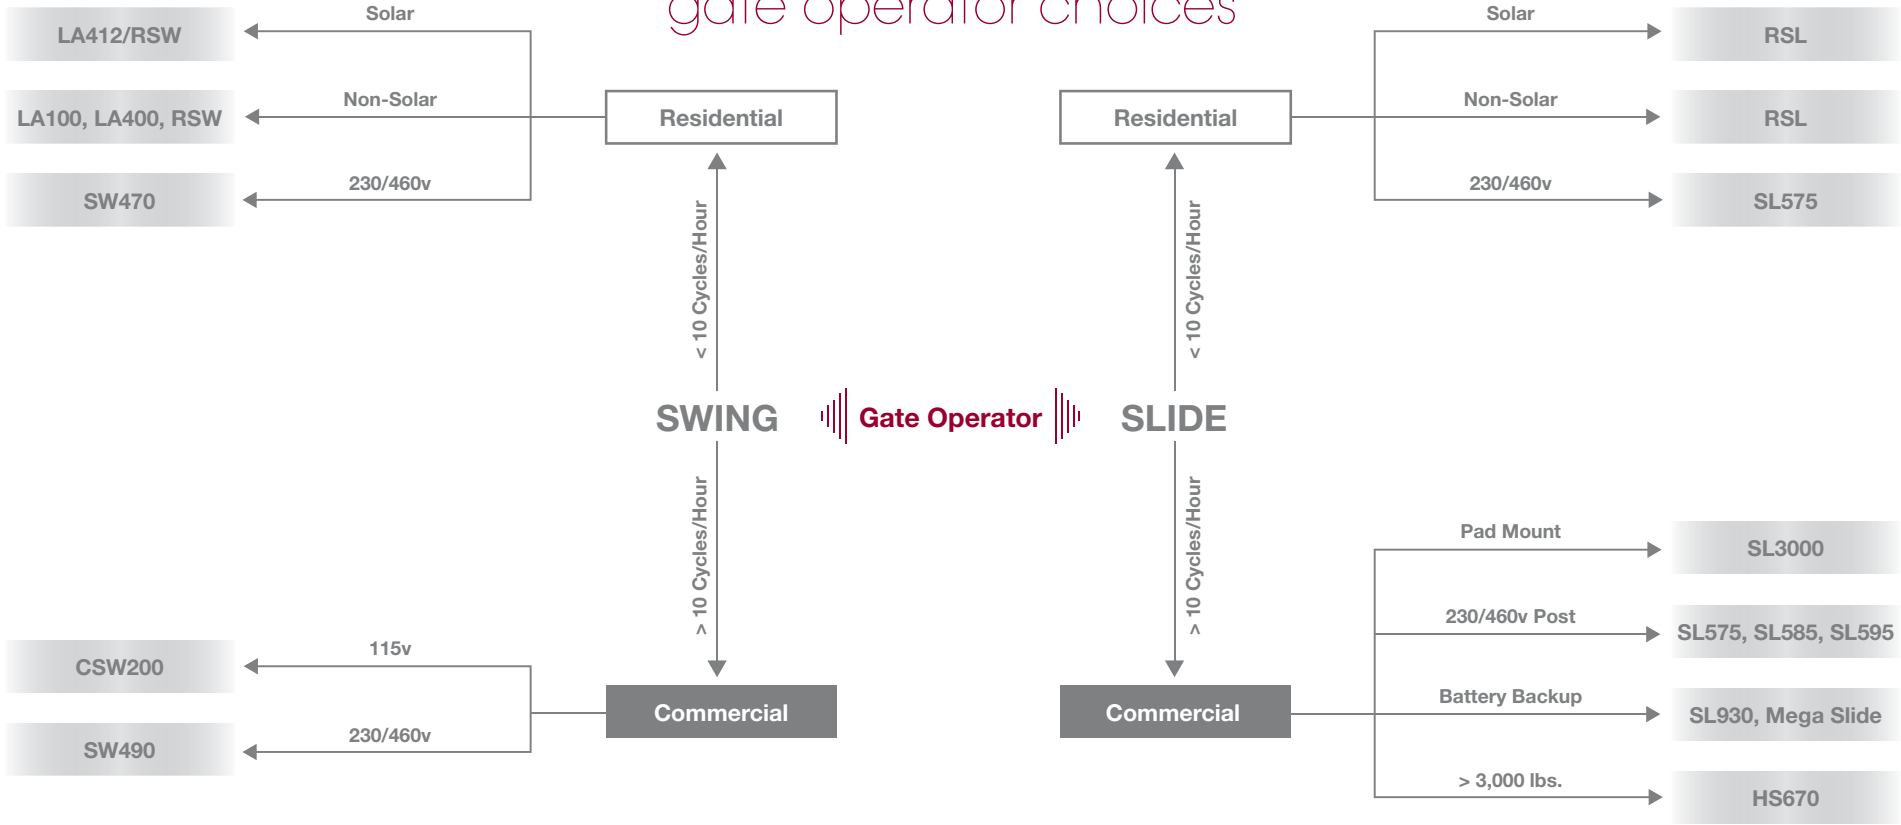

## how to specify

When specifying a LiftMaster® Gate Operator, 3 selections must be made to ensure safety and efficiency:

- Step 1: Select proper model type
- Step 2: Select horsepower rating
- Step 3: Select voltage, phase and frequency

# gate operator choices

## secure, convenient access controls

Managing access—it's this “invisible” capability that helps add convenience and security to any space. That's why LiftMaster's telephone entry systems and access controls help clients in gated communities, commercial buildings, high-security locations, manufacturing plants, high-end residential homes, and apartment and condominium buildings better manage the traffic flow.

Give your clients security and protection—in an elegant design. With several models to choose from—small system operations to large-scale access control systems—LiftMaster delivers voice communication, dedicated phone bill and non-phone bill options, and system management software.

### Single Tenant, Single Door

TAC1

The TAC1 provides wired communication and secure access control at gates and doors. Your clients can use any touch-tone phone in their home to speak to a visitor and then grant or deny access. Hardwired for power and connected directly to the existing telephone line, the TAC1 greets visitors with a highly visible, backlit keypad and styling that complements your design. Its rugged, tamper-resistant polycarbonate enclosure is engineered to resist dents and corrosion.

### Single/Multiple Tenant(s), Single/Multiple Door(s) or Gate(s)

EL25

The EL25 is beautifully engineered for private residences, yet fully adaptable for use in multi-housing units and commercial sites. Unmatched in its class, the EL25 can easily manage 2,000 FLEX-CODES.

### Multiple Tenants, Multiple Doors or Gates

EL2000

The EL2000 complements virtually any gated community and is flexible enough to be used in apartment buildings, condo complexes, office parks and commercial sites. With a 5-inch backlit LCD screen, the unit clearly displays up to 80 characters and accepts up to 2,000 FLEX-CODES.
