GearBoss® by Wenger

is a complete, state-of-the-art line of equipment designed to help your athletic program. From storage, to lockers, to equipment transport and fundraising solutions, GearBoss products save you time, space and effort. They're flexible and customizable so your system can change as your needs change. And all GearBoss equipment is built strong to manage all your gear for years to come. GearBoss has a solution for just about any budget and you can add carts and shelves as your needs grow.

"Previously we had two storage rooms side by side, separated by a support wall. With the GearBoss system, we now need just one-third of the storage space for the same amount of equipment. With the space we saved, we converted one room into a coach's work room, something we never had before."

- Dan Johnson, CMAA, Athletic Director, Hopkins High School, Minnetonka, MN

SPACE SAVING STARTS WITH GEARBOSS

SPACE

The average athletic program manages an immense amount of gear. Managing it all can be a daunting task – especially if your storage space is limited. **GearBoss Is The Answer.** GearBoss delivers a unique solution that increases the storage capacity of your rooms by as much as 50-75%, while greatly improving organization and access. GearBoss carts also give you the ability to roll the entire team's equipment closer to the point of use. You can even secure the cart under stairs, in the hall or right in the gym, creating temporary storage space where you never had it before.

- Win back 50%+ capacity in your storage areas
- Achieve cubic density
- Improve ease and speed of access to equipment
- Create secure transitional/temporary storage around your facility
- Get storage closer to points of use
- GearBoss locker designs have integrated seats – eliminating fixed benches that waste floor space

It is critical to think in terms of cubic volume and to pack cubic volume as densely as possible. With traditional methods this usually translates into boxes on top of boxes, piles in front of piles and a complete lack of visual inventory and access. No other solution allows you to achieve such dense cubic volume while greatly improving access and organization.

"The mobility of the Team Carts also saves time. They easily roll wherever we need them, so we don't need to load equipment off and on a cart for transportation. Everything's there – we just take off what we need."

- Joe Delaney, Head Football Coach/ Equipment Manager, Grand Blanc High School, Grand Blanc, MI

EASY MOBILITY STARTS WITH GEARBOSS

People and equipment in any athletic program are constantly on the move. From the gym, on the bus to away games, to the field-house and the locker room. Your equipment storage can and should be mobile as well. GearBoss by Wenger allows you to get the equipment close to where you need it. Team Carts™ can disengage from the track in your storage room and roll wherever you need them. Whether it's down the hall, or into a trailer or box truck, you can move the equipment you need, where you need it, in one easy trip – without breaking a sweat, or your back.

- Get all the equipment you need, right where you need it
- The flexibility to not only roll side-to-side in the storage room, but to roll off the track into the hallway, the gym, the field house, etc.
- Move your equipment to a temporary space
- Your time is valuable – don't waste it by having to make multiple trips back and forth to the storage room

Mobility in your equipment storage is key to being efficient and organized. Getting specific equipment closest to the venue it is used in creates fewer steps and touches. From locker room to game-site, gym floor to soccer field, GearBoss by Wenger makes storage as mobile as your program has to be.

MOBILITY

"In the past, we'd have equipment for one sport split between a locked cabinet, a rolling bin, and a hanging rod. Now, instead of going 'here, here and here' to round up equipment, we're only going 'there' to the GearBoss cart."

- Jaime Sherwood, Director of Athletics and Activities, Wayzata High School, Plymouth, MN

ROOM ORGANIZATION STARTS WITH GEARBOSS

The average school or professional team has thousands of pieces of athletic equipment to organize, store, transport and keep in working order. Time and budget constraints demand that you know what you have, where it is and that you maintain this equipment effectively. GearBoss by Wenger forces organization and allows you a quick visual inventory of all your equipment for every sport. A place for everything and everything in its place.

- Divide and organize your storage room by team, giving individual coaches better control and security of each sport's equipment
- Understanding what you have, will save you money – no re-ordering mouthguards and jerseys because you can't locate the ones you ordered last season
- Manage your inventory – don't let it manage you

Organizing your key pieces of equipment will keep you on a strict maintenance schedule. GearBoss will allow you to know what you have, what needs work and help you keep critical records of reconditioning and inspection. A system that shows attention to organization and equipment care is one big step in heading off liability issues.

ORGANIZATION

"I like the flexibility of the carts, and the ability to configure the shelves, hangers and garment bars to best suit our needs."

- Justin Bogunia, Athletic Director, John Glenn High School Walkerton, Indiana

EQUIPMENT ROOM FLEXIBILITY STARTS WITH GEARBOSS

Traditional wire cages and stationary shelves don't provide the flexibility that athletic programs need to function efficiently. Too often these spaces become such a jumble of boxes and bins that cage doors get blocked and no one can see what the program has or needs. GearBoss by Wenger is designed to adjust as your programs change and is flexible enough for any coach or equipment manager to reconfigure to his/her own organizational style.

- The GearBoss system is flexible enough to fit any space, to be used by any staff member, and to fit many types of gear
- GearBoss is so flexible you can move the entire system to a new or renovated facility
- GearBoss allows you to maintain high density storage, even when equipment changes from season to season
- Shelves and garment bars are adjustable
- Cubbies and accessories provide further flexibility

Each coach has a different organizational style. Each season has different equipment requirements and every space is different. You need a storage system that is flexible enough to address all of these issues. GearBoss by Wenger brings you the flexibility you desire while still maintaining the organization and inventory management needed to run your program efficiently.

FLEXIBILITY

"I like the GearBoss system. We need spaces that are clean and are easy to keep clean. Spaces that promote organization and airflow are the first step to winning the sanitation war. The odor isn't gone, but I am very surprised at how much of a difference this system makes."

- Terry (T.C.) Carlyle, Athletic Trainer, Owatonna School District, Owatonna, MN

EQUIPMENT SANITATION STARTS WITH GEARBOSS

MRSA virus, mold, mildew, bacteria and staph issues can be a burden on your athletes and your program. Many options claim to solve the problems, however, they only mask the symptoms. GearBoss storage balances cubic density with optimum air flow, and by design starts the fundamental first step to a solution – an organized, clean and cleanable room.

- Achieve high density storage without losing critical air flow
- Carts, shelves and lockers are designed to get equipment and uniforms off the floor making cleaning underneath easier
- Carts and shelves assist you in organizing critical pieces of equipment like helmets, jerseys and warm-ups into a specified cleaning rotation
- Lockers are treated with an antimicrobial finish
- Security doors and closures are designed to create gaps that allow airflow, while ensuring your equipment is safe and secure

Face it, if your living room smelled like your locker room, you would find a solution - odor is a sign of a problem. Let us assist you today in creating the right athletic space for your needs and eliminate costly sanitation issues.

SANITATION

"In the past we had a number of uniforms, jerseys and bags disappear. Now our storage rooms can be open 24/7 and I'm not worried because everything is locked securely in a GearBoss cart. The GearBoss system is a good investment – coaches like not having to worry about equipment disappearing."

- Derek Fahleson, Asst. Principal/Athletic Director, Estrella Foothills High School, Goodyear, AZ

SECURE STORAGE STARTS WITH GEARBOSS

The average suburban school has well over \$1.5 million in athletics equipment. Keeping an eye on your investment is increasingly important. You're probably well aware of the cost to replace each helmet, jersey and warmup you own. That's why GearBoss by Wenger provides increased levels of security over traditional shelves and cages. Each cart can be securely locked to keep your gear where you leave it.

- Lockable doors and sliding side panels on all carts secure everything inside
- Individual team carts can be secure even if the storage room is left unlocked and access to the room is unsupervised
- Secure those logo items that seem to walk off on their own
- Knowing what you have, at-a-glance, will increase the chances you notice something is missing
- Secure team room lockers ensure that individual athlete's personal items are safe from theft

You wouldn't leave your stadium doors, practice field or gym unlocked. Your program has a significant investment in equipment. Make sure that you keep it as safe as you can. With GearBoss by Wenger, you always know what's in and what's out and when its not in use you can lock it up. Equipment that is organized and secure is more difficult to pilfer.

SECURITY

"We bring every single recruit through our equipment room. In most schools it's nothing fancy, just a hidden warehouse that no one ever sees. We don't have that mentality – our equipment room is just as important for its "wow" factor as every other room in the facility. Our administration feels that way and so do our coaches."

- Don Barnes, Director of Equipment Operations, University of Missouri, Columbia, MO

PROGRAM PRIDE STARTS WITH GEARBOSS

Excellence, dedication, personal best and pride in the program are all key messages that programs strive to demonstrate. We often hold our student athletes to a higher standard, yet too often athletic facilities don't convey these same messages. GearBoss by Wenger allows you to provide an immediate visual message of pride in your program, through increased organization, team colors and logos.

- Your team and equipment room will portray excellence and pride through cleanliness and organization
- Add your team logos and colors
- From storage closet to front office, make every part of your facility reflect the pride of your program
- A well-organized athletic facility may help improve athlete recruitment and alumnae donations

GearBoss by Wenger will put the pride back in your team and equipment room. The organization and cleanliness of your GearBoss equipment covered with your team colors and logos will make a positive impact on everyone who comes in contact with your athletic program.

PRIDE

RESPECTING THE ENVIRONMENT

As a member of the U.S. Green Building Council, Wenger has committed itself to think and act "Green". This includes conserving energy wherever feasible, recycling, reducing waste, reducing harmful emissions, and using environmentally friendly raw materials, finishes and processes. It's part of our respect for how our products work and how their creation affects everyone – our customers, our community, our country and our employees. Wenger is continuing our efforts to help you achieve your environmental goals by offering more products made of recycled and recyclable materials and have recently achieved GreenGuard certification on our Storage products. We also have resources available to assist you in achieving LEED certification.

Wenger is a member of the USGBC

The U.S. Green Building Council (USGBC) is a 501(c)(3) non profit composed of leaders from every sector of the building industry working to promote buildings and communities that are environmentally responsible, profitable and healthy places to live and work. www.usgbc.org

Wenger is certified by GREENGUARD®

for our GearBoss storage carts and AirPro™ metal lockers. GREENGUARD is a product certification program for low-emitting interior building materials, furnishings, and finish systems used in educational, office and other sensitive environments. www.greenguard.org
