

Connectors

These components provide the connections needed to complete your design. The Shelf Connectors allow two shelves to share one ISS Bracket and the Pole Connectors add join two pole sections together to make one longer pole section. Use "L" connectors to attach a horizontal pole section to a vertical pole, to mount a tie pole section to the wall or to attach a pole to the floor or ceiling.

	Item Number	Name	Dimensions	Description
	TC-002	Shelf Connector	2" x 1"	Use a set of two connectors when two shelves share the same bracket. Also use to secure shelf to bracket.
	PC-004	Pole Connectors	4" Length	Set screw tightens into both pole sections to secure poles to each other. Used with extension kits. Two needed for each connection.
	LC-002 LC-0035	L-Connector	2" x 2" 3.5" x 3.5"	L-Connectors used to connect tie pole section to the pole and the wall. Use to secure to the pole to the floor and ceiling. Includes set screws.
