

## Shelves

The ISS shelves are available in sizes from 6" to 24" depth with a length of 24" to 96". Shelves may extend across a wall on top of brackets or shorter shelves may share a bracket by using a pair of the shelf connectors (TC-002). All shelves are shipped directly to our customers to install on their ISS Designs hardware components. By using thermal-fused melamine for our shelves, we can combine eye appeal with quality and durability. The shelves are thermal-fused under intense heat and pressure, permanently bonding the resin-saturated paper to the substrate for extraordinary strength and toughness. The wood grains of maple, cherry and mahogany offer a finish that is natural with the benefit of being wear-resistant and easy to clean. Custom size shelves are available, please call or e-mail for details.
