

Steel and Steel/Aluminum Security Floor Doors

- ✓ Flush cover styles are finished out flush with the concrete surface to present no obstruction or hazard to floor traffic.
- ✓ The patterned 3/16" steel or 1/4" aluminum metal surface cover provides safe, non-skid footing.
- ✓ Standard reinforced construction handles uniform loads of 150 psf.
- ✓ Hardware is mounted to zinc-plated, riveted, triple-leaf lift hinges, stop chain, and a rigid hold-open arm on each leaf.
- ✓ Cover is mounted to frame with cast steel hinges with torsion springs, complete with automatic hold-open arm and automatic snap latch. Fixed inside handle for access with removable outside handles for security access.
- ✓ Security floor doors are available in two materials to meet specific design criteria- steel, prime painted, FA Series and aluminum cover, steel frame, FC Series.
- ✓ Single leaf covers are equipped with automatic snap latch having fixed inside and removable outside handles. Double leaf covers are fixed with a throw bolt on the inactive leaf and a latching mechanism having fixed inside and removable outside handle on the active leaf.
