Finishes

Access floors have emerged as a practical solution for numerous building types, not just the traditional office and data center settings with which they are most often associated. Tate Access Floors has made a commitment to service the needs of both existing building and new construction markets by expanding our product offering to include new and exciting finishes such as luxury vinyls, wood veneers, cork rubber and stone as well as the traditional high pressure laminates, static control vinyls and freelay carpet and hard tile finishes.

Tate Access Floors Approved Finishes List....For chip samples, please click on the supplier links below.
