

◆ ENCLOSURES ◆

The most widely used shower door product in America is the sliding tub and shower enclosure. Decorative yet durable, our enclosures meet the high standards of all AMERICAN SHOWER DOOR products. Using minimal space for maximum function, they combine with side panels or overhead transoms to fill large or small spaces.

Glass thickness may vary from 3/16" to 1/2" (as seen on page 5 in our CRYSTAL COLLECTION) using artistic patterns, etched designs or beautiful clear clean glass. Selecting anodized aluminum or architectural brass, you have an unlimited rainbow of metal finishes.

CLOSED TRACK (CT)

Useful for extra durability and strength, the closed track offers you the option of a very sturdy unit. Always used on the 272 steam enclosure to assure the tight fit necessary for functionality.

OPEN TRACK (OT)

The easy-to-clean open track replaced the hard-to-clean "E" track in the 1970s. Today this sturdy and stable system with 4" tough nylon guide and efficient open "L" track make our enclosures safe and virtually maintenance free.

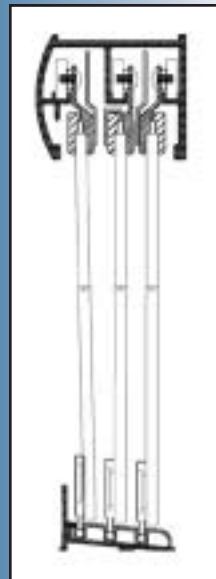

Frameless Triple Sliding Enclosure

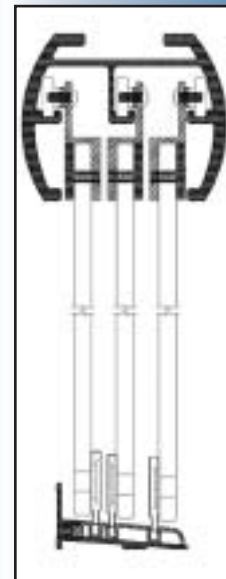

The three-panel TRIPLE SLIDING ENCLOSURE adds an extra 15% clear opening on your shower. (This translates to 9" on a 60" tub.) Using 1/4" or 3/8" glass, through-the-glass solid brass hardware is standard.

Available in BDS, BDB, SNA and PC.

Tropic 272

Attractive standard towel bar is optional.

The TROPIC 272 is a true steam sliding enclosure. S-vault jambs and brushed pile seals give you a tight steam application where a sliding enclosure is the best site application. A framed unit using 3/16" or 1/4" glass, this design is available in BDS, BDB or powder coat colors. Handles in the rail complete the standard accessory.

Starlite 703

A towel bar is standard on all aluminum enclosures.

A lighter unit than the 253, the STARLITE 703 features standard 1" rails and offers a quality installation for the price sensitive application. Available in Satin, BDS, BDB or Powder Coat.

Classic 253

The top header is extra strong to eliminate flex and vibration.

Our CLASSIC 253 enclosure is clearly the class of the enclosure industry. Distinctive double sliding panels, framed with mitred 200 beveled rail, define elegance in enclosure design, with optional S-jambs or closed track. Available in all aluminum finishes.

Elite 806

The 806 header is strong yet unobtrusive for a quietly elegant enclosure.

Engineered to excellence, the ELITE 806 offers the ultimate options in a 1/4" frameless enclosure. Using the finest technology, the 806 incorporates S-jambs, improved tracks, guides and bumpers to create another fine product. **Through-the-glass hardware is a recommended upgrade.** All aluminum finishes are available.
