QUALITY COATING SOLUTIONS

OUTSTANDING PERFORMANCE

For more than 125 years, Benjamin Moore & Co. has consistently delivered paint products that define the industry's high standards of quality, performance, and innovation for architectural, commercial, high performance, and consumer markets. Our unparalleled color capabilities, commitment to research and development, and comprehensive product offerings ensure coatings that stand up to the most demanding requirements. Our special support services deliver welcomed assistance in planning, specification, and application. Whatever the project, Benjamin Moore & Co. offers a coating system that will meet the need.

THE SCIENCE OF MAXIMUM PERFORMANCE

Benjamin Moore & Co.'s ongoing rigorous scientific testing ensures stringent product standards, consistently reliable quality, and innovative product development. Our resources include:

- More than 100 dedicated chemists, chemical engineers, technicians, and support staff.
- An 80,000 square foot technical and administrative center.
- 10 team-based laboratories equipped with state of the art instruments, each focusing on a specific area of coating expertise to analyze, monitor, and develop Benjamin Moore® quality products.

These resources enable the in-house development, refinement, and production of critical coating components such as polymers, which most paint companies must obtain from outside sources. Benjamin Moore & Co.'s extraordinary commitment to research and development underwrites formulations carefully tailored to specific requirements and superior quality assurance for maximum performance.

Due to state and local VOC regulations, not all products are available in all areas. If your project is located in a regulated area, please contact a Benjamin Moore representative for alternate compliant products.

PREMIUM/RESIDENTIAL INTERIORS

Specify **Aura®** or **Regal®** products for interior applications where nothing less than the best will do. **Aura®**, with our exclusive **Color Lock®** technology, offers superior coverage with incredible depth of color in an eco-friendly formula that dries quickly. **Regal®**, the classic favorite for years, now comes with **Advanced Particle Technology® (A.P.T.®)** for a more durable, uniform finish, with faster re-coat time and easier touch-ups.

Aura® Waterborne Interior Paint **Regal® Latex Interior Paint**

- | | |
|---------------------------------------|----------------------------------|
| ■ Color Lock® technology | ■ Formulated with A.P.T.® |
| ■ Ideal for use with Affinity® colors | ■ Proprietary 100% acrylic resin |
| ■ Self-priming | ■ Stain-resistant |
| ■ No more than two coats | ■ Fade-resistant |
| ■ Achieves LEED® credit | |

COMMERCIAL/INSTITUTIONAL

We offer three major product lines formulated with the professional user in mind to meet every commercial coatings requirement—**SuperSpec®** premium professional coatings, **SuperHide™** commercial coatings, and **EcoSpec®WB** environmentally sensitive coatings.

SuperSpec® Premium Professional Coatings

Designed for new specified construction and repaint work, **SuperSpec®** premium professional coatings are specially formulated to meet the demands of the professional user. These products feature:

- | | |
|---------------------------------------------------|----------------------------------------------------------|
| ■ Complete interior and exterior coatings systems | ■ Fast-dry formulas for quick recoating |
| ■ Superior quality | ■ Low temperature exterior application |
| ■ Unlimited color-matching capabilities | ■ Excellent hiding, touch-up, uniformity, and durability |
| ■ Easy application | |

HIGH PERFORMANCE

Protection against extreme industrial environments

Specify our complete line of **Super Spec HP®** products for long term protection and aesthetic appeal. They are specially formulated to address a wide variety of substrates and environments. Rust inhibition, chemical and abrasion resistance, and graffiti removal are just a few of the performance attributes we've built into our product line, including:

- | | |
|----------------------------------------|--------------------------------------------|
| ■ direct-to-metal coatings | ■ high-performance floor coating systems |
| ■ high-solids epoxies | ■ tintable 100% solids epoxy floor systems |
| ■ single component urethane and alkyds | |
| ■ urethane coatings system | |

Benjamin Moore® high performance coatings offer solutions for the most demanding applications including:

- | | |
|----------------------------|------------------------------------|
| ■ General maintenance | ■ Food processing facilities |
| ■ Commercial facilities | ■ High performance floor systems |
| ■ Manufacturing facilities | ■ Storage and distribution centers |

PREMIUM/RESIDENTIAL EXTERIORS

Specify Aura® Exterior or MoorGard®, MoorGlo®, and MoorLife® products for superior exterior applications.

- Aura® Exterior paint, with our exclusive Color Lock® technology revolutionizes paint color integrity and ensures that the color lasts year after year in a low-VOC mildew resistant formula.
- MoorGard®, MoorGlo®, and MoorLife® all share a unique fortified acrylic formula that grips the substrate providing unparalleled adhesion to weathered surfaces. This proven technology will perform exceptionally while providing great hide, resistance to fading, and resistance to mold and mildew growth.

ENVIRONMENTAL/LOW VOC/ZERO VOC

Benjamin Moore's premium LEED-qualified products

- Natura®, the newest addition to the Benjamin Moore offering is a zero-VOC, virtually odorless formula providing a durable finish and excellent adhesion with an unlimited color selection. Natura® is the choice for the most demanding environmentally conscious customers.
- Eco Spec® WB, an improved version of the original that can be tinted to any color in the Benjamin Moore® color collection, utilizing the zero VOC Gennex® colorant system.

Our Green Promise® designates coatings that offer both lower total volatile compounds and a premium level of paint performance. It is your assurance that our environmentally friendly coatings meet and exceed the strictest industry standards, while also delivering the performance you expect from Benjamin Moore.

PREMIUM PRIMERS

Fresh Start® primers are the first step to a complete premium painting system that is designed to maximize the performance and longevity of a Benjamin Moore® topcoat. These primers:

- Ensure the topcoat adheres firmly
- Boost the topcoat's hiding power
- Prolong the life of the paint job
- Ensure uniform topcoat color and gloss level
- Are specially formulated for superior performance on any type of substrate
- Can be tinted when using a deeper color finish coat to achieve a uniform look and reduce the number of topcoat applications

SPECIALTY PRODUCTS

A full spectrum of Benjamin Moore® coatings protection for unique applications

Exterior Wood Stains:

- Arborcoat™, Benjamin Moore's premium water-borne exterior stain is a unique waterborne product offering a wide variety of opacities and a specialized transparent and semi transparent deck system.
- Benjamin Moore® Exterior Stains in solid color, semi solid, semi transparent, transparent, and clear offerings to enhance and protect wood surfaces.

Interior Stains and Varnishes:

Benwood® interior penetrating stains and polyurethane wood finishes.

Specialty Primers & Finishes:

- Several Benjamin Moore Fresh Start® exterior and interior primers are specially formulated for specific surface requirements such as smoke damage, marker and crayon stains, knots, and bleeding wood stains.
- The intumescent 220 Latex Fire Retardant Coating P59 retards flame spread and minimizes smoke development.

Floor Coating Systems:

This full range of floor coating systems is part of our high performance line, including single component urethane and epoxy alkyds, acrylic and solvent based epoxies, two component and moisture-cured urethanes, and 100% solids epoxies.
