ASTM E-1680 Air Infiltration Tested
ASTM E-1592 Tested
Florida Product Approval

The Ultra Seam standing seam systems utilize state of the art technology for roof and wall integrity and positive weather-tightness. Our continuing interest and expertise in the Architectural Metal industry has enabled us to design, manufacture, and install products of the highest quality at a competitive cost with timely performance.

All our roofing systems are designed to meet the highest quality standards, as well as the simplest installation requirements. They also offer the tools for design flexibility with high level of aesthetic quality.

Whether your requirements are low or steep slope, mansards, retrofit, fascias, coping, soffits, walls, or equipment screens, Ultra Seam has a suitable system. These systems can span across purlins on typical spacing, or laid directly over rigid insulation and/or solid decking. We offer many combinations of panel widths, rib heights and seam profiles, for different architectural applications.

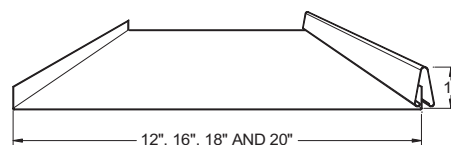

US-175LS LOCK SEAM
