

## The best roof money can buy.™

FOLLANSBEE ARCHITECTURAL TERNE ROOFING MATERIALS

Revolutionary ZT® alloy separates all Follansbee materials from ordinary metals – It's the most corrosive-resistant architectural coating available today.

# TCS SATIN™

MICROEMBOSSED  
TERNE-COATED STAINLESS

Type 304 stainless, coated with ZT® alloy

Used for non-structural roofing and exterior wall applications

### ADVANTAGES

- Microembossing imparts instant low-sheen gray patina
- Unprecedented corrosion resistance (15,000 hours in ASTM B117 & D4585)
- Never requires painting
- Maintains soft gray patina and even color over time
- Fully solderable, providing long-lasting joints and durability

### STANDARD SIZES

GAGE: 24 ga./0.024", 26 ga./0.018" and 28 ga./0.015"

SHEETS: Widths – 20", 24" and 36"  
Lengths – 8', 10' and 12'

ROLLS: 50' and 100' in all widths

20" ID COILS: 2,000 to 4,000 lbs. in all widths

NOTE: Original TCS II® terne-coated stainless with ZT alloy is also available and weathers naturally over time to a soft gray patina.

# Klassic Kolors<sup>®</sup>

FACTORY-COATED  
SOLAR-REFLECTIVE TERNE

ASTM 625-95 prime carbon steel, coated with ZT alloy

Used for non-structural roofing and exterior wall applications

Available in 21 standard factory-applied solar reflective coatings

## ADVANTAGES

- Provides a historically accurate low-sheen terne roof aesthetic
- Outstanding corrosion resistance
- Requires no painting on the job site
- Meets or exceeds the ENERGY STAR solar reflectance value criteria for steep slope roofs
- Provides the cost and energy savings benefit of a “cool roof”
- Fully solderable, providing long-lasting joints and durability

## STANDARD SIZES

GAGE: 28 ga./0.015”

SHEETS: Widths – 20”, 24” and 36”  
Lengths – 8’ and 10’

ROLLS: 50’ and 100’ in all widths

20” ID COILS: 2,000 to 4,000 lbs. in all widths

# Terne II®

TERNE-COATED STEEL

ASTM 625-85 prime carbon steel, coated with ZT alloy  
Used for non-structural and exterior wall applications  
Requires Follansbee Rapidri® acrylic painting system upon installation

**ADVANTAGES**

- Most economical Follansbee roofing material available
- Outstanding corrosion resistance
- Favorite of architects and owners conscientious about historical accuracy
- Fully solderable, providing long-lasting joints and durability

**STANDARD SIZES**

GAGE: 28 ga./015" and 30 ga./012"  
 SHEETS: Widths – 20", 24", 28" and 36"  
 Lengths – 8' and 10'  
 ROLLS: 50' and 100' in all widths  
 20" ID COILS: 2,000 to 4,000 lbs. in all widths

**DURABLE, BEAUTIFUL, HISTORIC RAPIDRI® PAINT SYSTEM**

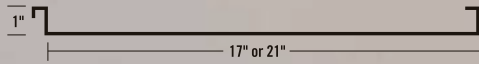

Follansbee Rapidri® is a fast-drying, water-based acrylic coating that may be roll-, brush-, or spray-applied. It is available in two standard prime colors, 12 standard finish colors and unlimited custom colors.

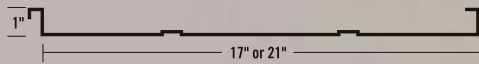

## ROOFING PANEL PROFILES

Eight distinct preformed panels are available direct from Follansbee distributors. These panel profiles are available in all fine Follansbee terne materials.

### 1" DOUBLE LOCK STANDING SEAM

### 1" DOUBLE LOCK STANDING SEAM WITH PENCIL RIBS

### 1" CAP SEAM

### 1" SNAP SEAM WITH STRIATIONS

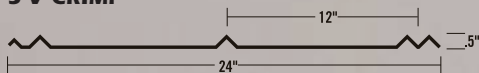

### 1" SNAP SEAM WITH NAILER STRIP AND STRIATIONS

### 1" LOC - SEAM WITH STRIATIONS

### 5-V CRIMP

### 2.5" AND 1.5" CORRUGATED

## STAMPED DIAMOND PATTERN SHINGLE

Manufactured by Conkin Metal Industries, this unique and classic shingle is available in your choice of fine Follansbee roofing materials including TCS Satin, Terne II and KlassicKolors.

- Superior to asphalt or other materials
- Most durable and longest-lasting metal shingles available today
- Side lock permits quick and easy installation with no soldering required
- Weathertight side lock provides contact under tension at three points, covering all nail heads, allowing for expansion and contraction.

## SNO-GEM® SNOW GUARDS

Sno-Gem, a leader in the snow guard industry, manufactures two popular snow guards for Follansbee using TCS Satin. These snow guards are soldered directly to the roof, eliminating the need for sealants and glues.
