

# VERTICAL ACTING FIRE & SMOKE RATED DOOR SYSTEMS WITH EMERGENCY EGRESS

## SAFESCAPE® T5000 SERIES

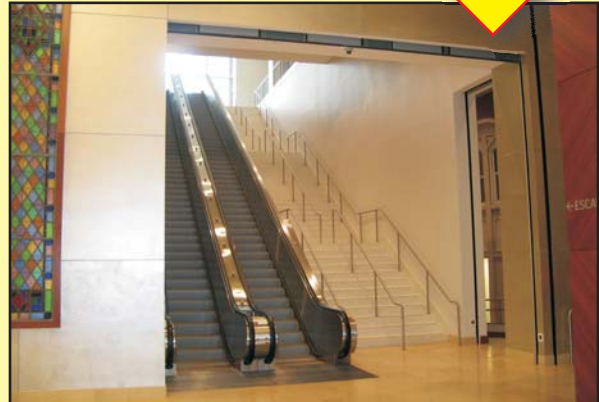

**Product Description:** The automatic resetting Safescape® T5000 Series Fire Door Systems, with built-in emergency egress are vertical acting, coiling fire doors and are available with up to 18 swinging type emergency egress doors.

**Product Advantages:**

- The Safescape® T5000 Series Fire Door Systems utilize the Auto-Set® system and therefore are easy to test and automatically reset.
- The Safescape® T5000 Series Fire Door Systems offer design flexibility by allowing the design professional to visually open up large areas in fire walls that require emergency egress.
- The Safescape® T5000 Series Fire Door Systems can be used in areas of high occupancy load requirements of up to 4,500 persons.
- The Safescape® T5000 Series Fire Door Systems require a minimum amount of side room and they require approximately 9 feet of headroom.
- The Safescape® T5000 Series Fire Door Systems are completely undetectable when in the stored fire ready position. They require no electricity or battery back-up systems when they are activated to the self-closing fire condition mode.

**Design Alternatives:** The Safescape® T5000 Series Fire Door Systems eliminate the need for conventional construction which can vastly reduce the desired form, function and appearance of the opening by installing multiple swinging doors and mullions.

**Applications:** The Safescape® T5000 Series Fire Door Systems are typically used in high occupancy applications such as convention centers, casinos, arenas, sports centers and museums. The intent is to allow for large spaces or areas to remain open and clear for ease of circulation and aesthetical desires.

Safescape® T5000 Fire Door Systems are undetectable when in the fully open, stored and fire ready position....

When activated, the fail-safe system lowers the coiling curtain and swinging emergency egress doors down into position....

...creating the fire & smoke protection necessary for the opening while still allowing for Emergency Egress.
