# SIDE ACTING FIRE & SMOKE RATED DOOR SYSTEMS

## S7000 SERIES

**Product Description:** The S7000 Series Fire Door Systems are comprised of six side acting variations. The S7000 Series are available in both manual or motor operated designs and with or without emergency egress doors.

**Product Advantages:**

- The S7000 Series Side Acting Fire Door Systems are easy to test and can be automatically reset.
- The S7000 Series Fire Door Systems require only 6" of head room.
- The S7000 Series Fire Door Systems are completely undetectable when in the stored and fire ready position.
- The S7000 Series Fire Door Systems are fail-safe by design and do not require electricity or battery-back-up systems when in the self-closing fire condition mode.
- Most S7000 Series Fire Door Systems are available without floor tracks.
- The S7000 Series Fire Door Systems can navigate around contoured openings. Without egress doors they can navigate around a radius as small as 1'-0", with egress doors they only require a 5'-0" radius.

**Design Alternatives:** The S7000 Series Fire Door Systems eliminate the need for conventional construction which utilizes unsightly permanent door frames and swinging doors. The conventional method significantly reduces overall opening size and obstructs desired sight lines.

**Applications:** Safescape® models S7400, S7500, S7700 & S7900 Fire Door Systems are ideal for any applications where fire protection and emergency egress are required. Models S7200 & S7600 are ideal for any applications where only fire protection is required and egress is not an issue.

**SAFESCAPE® S7900  
FIRE DOOR SYSTEM**

**SAFESCAPE® S7400  
FIRE DOOR SYSTEM**

**SAFESCAPE® S7700  
IN THE OPEN POSITION**

**SAFESCAPE® S7700  
IN THE CLOSED POSITION**
