Brick Company

Watson town Brick Company

The demands of anyone investing in brick are usually pretty straightforward — people want a product they can afford, a product that looks great, and a product that will last. At Watson town Brick Company we've devoted over 90 years to perfecting the process of producing brick that meets the demands of even the most discerning customer. Whether that customer is a homeowner looking to spruce up the backyard with a garden walkway or a stadium designer giving a city a new look, Watson town Brick can provide them with exactly what they need to get the job done.

By using only the best raw materials, Watson town Brick is able to produce brick that measures up to the highest quality standards. The native red shale we draw from our own Pennsylvania quarry is among the purest in the industry, and the water used to create Watson town brick is drawn from deep wells, mixed with pulverized shale to allow extrusion and shaping, and tested regularly for mineral deposits. When firing our brick, we use a higher temperature than required to bring out the brick's full color while increasing its strength and absorption.

Superior bricks start with superior raw materials, and Watson town Brick has them in abundance. Quality materials, however, are merely the beginning of a process which relies on expert craftsmanship to shape these materials into a product of unmatched beauty and durability. With the resources necessary to fashion brick of impeccable quality and a staff dedicated to its production, Watson town

Brick Company ensures that every brick leaving its facility is as good as the next one.

Watson town brick products are available in a vast array of sizes, shapes, and colors. Watson town facing brick, which can complement any style of building, is offered in a variety of colors and styles, and Watson town brick shapes are available in numerous colors and a wide range of specialty shapes. And when it comes to patio, terrace, or walkway designs, Watson town paving brick is a beautiful and economical alternative to concrete or asphalt.

Many projects require brick products that are not part of our standard line. Watson town Brick Company welcomes special requests and we will do all we can to accommodate them. If it's a custom size, shape, or color you require, Watson town Brick will be happy to discuss your specific needs.

Manhattan Series

Breaking away from our traditional red brick, the Manhattan Series adds versatility to our color line up. Made in our new state of the art manufacturing facility you can choose from pure buff colors to creamy tans, medium chocolates and grays, in smooth or velour textures, and a variety of sizes. Your next building project can become a reality with this new series.
