STONHARD

Seamless Solutions

Good Designs Don't Just Happen

They are created using innovative, practical solutions that are both design worthy and cost-effective. Stonhard's engineered flooring solutions meet the varying demands of commercial and industrial facility projects. Available in an extensive palette, standard and sophisticated color capabilities, textures and intricate configurations to meet your discriminating design plans, all while guaranteeing durability, ease of maintenance, chemical, abrasion and slip resistance. Effortlessly take flooring to another level by incorporating logos, geometric shapes and specific color schemes into your plan.

The Seamless Advantage

Pure and simple — seamless means cleaner. With seamless floors there are no joints or cracks to trap dirt and bacteria. And they're easier to maintain. Under most conditions, a wet mop or stiff brush and heavy-duty detergent will yield beautiful results.

The Safety Factor

When it comes to floors, slips and falls shouldn't be a concern. Stonhard's slip-resistant flooring can prevent accidents. Stonhard floors are available in a variety of textured surfaces that remain safe, even when wet or oily.

Logos, Inlays, Borders

Form as well as function. Our floors are available in a wide array of standard and custom colors, tweed blends and patterns. You can create a floor with inlays — even logos. Or seamlessly integrate a combination of Stonhard floors. Your options are limitless.

Sustainability

By their very nature our floors are sustainable, so the concept is not a new one for Stonhard; however sustainability remains at the forefront of product development. Stonhard floors are designed to last...When a Stonhard floor does reach the end of its long life, it will not end up taking up space in a landfill because our floors can be restored or replaced without removing the existing floors. Seamless, bonded floors become part of a building's structure. Now that's sustainability.

Stonhard takes full responsibility, from raw materials to installed systems. We work with each project from beginning to end — from design and specification through project management and the final walk through. Over 300 project engineers, 40 project managers and 200 application teams worldwide become an integral part of your project team to ensure that each application meets our high standards of quality. Whether you are an Architect, General Contractor or Building Owner, when you invest in a Stonhard floor you deal directly with Stonhard — from start to finish.

Markets

STONHARD

Market Applications

Stonhard's high-performance polymer floors can be found in both manufacturing and commercial facilities throughout the world. We offer tough, durable, abrasion and chemical resistant floors with

attractive, decorative finishes. Whether it's a traffic aisle in a processing area or an OR suite in a leading hospital, we have a customized solution for you.

PHARMACEUTICAL - BIOTECH

Stonhard has floor systems for every area in a pharmaceutical plant. Chemical resistant floors protect process areas. Smooth clean room floors ensure sterile environments and durable, decorative systems help project a quality image.

- Packaging Lines
- Laboratories
- Clean Rooms
- Animal Holding Areas
- Gowning Rooms
- Blending Rooms
- Processing Areas
- Lobbies
- Hallways

ELECTRONICS - SEMICONDUCTORS

Stonhard products meet the unique combination of needs found in an electronics facility: static control, chemical resistance, contamination control, durability and aesthetics.

- Quality Control
- Wafer Fabs
- Water Treatment
- Test and Inspection
- Assembly/Subassembly Areas
- Surface Mount Areas
- Wave/Reflow Solder Areas
- Clean Rooms

PUBLIC SPACES

Durability and progressive designs. Stonhard offers floors for busy public spaces that are long lasting, easy to maintain and work with today's sophisticated architectural designs.

- Museums
- Supermarkets
- Fitness Centers
- Zoos
- Corridors
- Lobbies
- Restaurants
- Car Showrooms
- Fire Stations
- Concourses
- Malls
- Stadiums

FOOD PROCESSING

Seamless, sanitary and easy-to-clean floors are required for a food processing environment. Our systems do not harbor dirt or support the growth of bacteria and resist acids and chemicals found in food and beverage processing plants.

- Mixing/Blending Areas
- Bottling Lines
- Bakeries
- Dairies
- Meat Packing
- Cold Storage
- Poultry Processing
- Seafood Processing

- Restrooms

Products

STONHARD

Stonhard Products

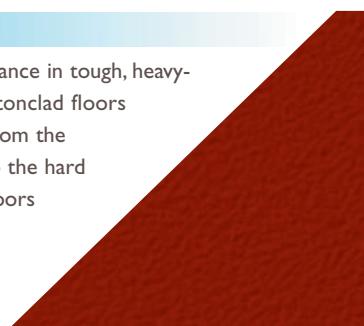

Stonhard offers customized floor, wall and lining systems for the most demanding environments. Our high-performance products are designed to protect against impact, abrasion, chemicals and thermal shock while maintaining a decorative, slip resistant, cleanable surface.

Each system is designed with a diverse array of formulations, textures, finishes, colors and patterns to provide performance and aesthetics for every design need.

STONCLAD

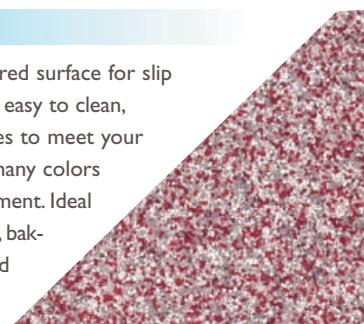

The Stonclad family of floors is noted for outstanding performance in tough, heavy-duty environments. Chemical, abrasion and impact resistant, Stonclad floors deliver long-lasting results and require little maintenance. From the corrosive conditions of chemical and food processing plants to the hard daily wear found in traffic aisles and assembly lines, Stonclad floors mean protection for any industrial setting.

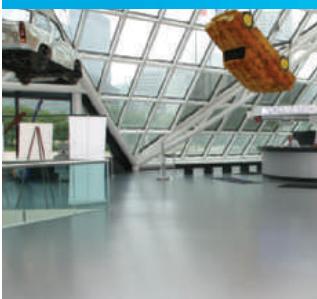

STONSHIELD

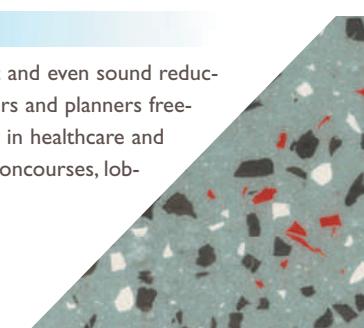

Stonshield flooring systems are specially designed with a textured surface for slip resistance and safety. Durable, chemical resistant, attractive and easy to clean, Stonshield floors are available in a range of textures and finishes to meet your specific requirements. These qualities, along with Stonshield's many colors and patterns, make it the right choice for virtually any environment. Ideal for outstanding protection in food service and preparation areas, bakeries and grocery stores, hospitals, educational, correctional and research facilities.

STONRES

Stonres floors are smooth, stain and wear resistant, ergonomic and even sound reducing. These systems offer distinct design elements giving designers and planners freedom and artistic expression. Stonres floors perform beautifully in healthcare and educational facilities, museums, pharmaceutical environments, concourses, lobbies and entryways.

STONTEC

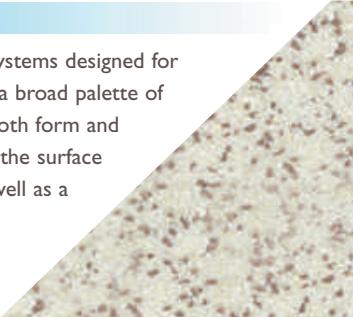

Stontec is a flake flooring system that combines a unique, decorative look with a dense, stain resistant surface that can be installed with quick turn-around time. Fast installation minimizes downtime for renovations and saves critical path time on new construction projects. These durable, decorative floors are offered in a wide variety of attractive color blends with limitless custom color options and are available in both samll and large flakes. Ideal for light manufacturing and commercial areas, including laboratories, hallways, offices and common areas in healthcare, educational and correctional facilities.

S T O N B L E N D

Stonblend floors are smooth, stain resistant and long-lasting systems designed for light manufacturing and commercial environments. Offered in a broad palette of blended colors and patterns this product skillfully combines both form and function. The Stonblend GSI-G series utilizes recycled glass in the surface of the floor as part of a commitment to the environment as well as a dramatic look.

S T O N L U X

Stonlux floors combine the performance of a high solids epoxy system with an easy to install formulation. These ultra-smooth systems resist chemical attack and provide durable, clean protection where vinyl tile just isn't enough. Stonlux systems are also impact resistant for long-lasting results. Ideally suited for outstanding protection in electronics manufacturing and assembly areas, computer/control rooms and clean room environments.

S T O N G L A Z E

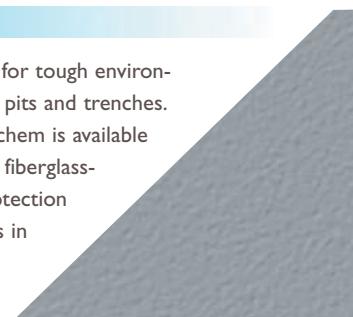

Stonglaze is a family of high performance wall systems formulated for application over concrete, block or drywall. Each system features a seamless, stain resistant surface that resists splashes and spills, fumes, abrasion, staining, graffiti and performs even after frequent wash downs. Stonglaze provides an easy to clean surface ideal for environments where sanitary conditions are a concern. Also offered in a high gloss finish that incorporates flake design for an unconventional look.

S T O N C H E M

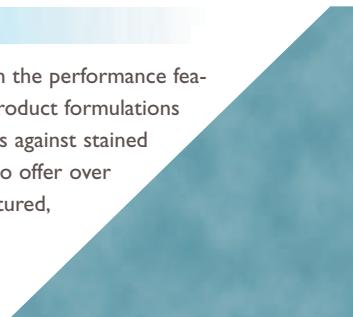

Stonchem lining systems provide tough polymer formulations for tough environments, including secondary containment areas, process floors, pits and trenches. From mild splash and spill to severe immersion service. Stonchem is available in five resin varieties with an array of configurations, including fiberglass-reinforced and broadcast systems. These systems provide protection for the most severe chemical exposures and physical demands in industry today.

S T O N T O P

Stontop floors have the look and feel of stained concrete with the performance features of a tough, industrial Stonhard floor. Available in three product formulations (epoxy, urethane and fast track technology), Stontop competes against stained concrete overlays for a modern, mottled look, but has much to offer over the competition. Stontop floors are durable, slip resistant, textured, and are less labor intensive to install.

Stonhard is a global leader in manufacturing and installing seamless floor, wall and lining systems with sales operations in more than 25 countries. Stonhard has a direct sales force in North America, Europe, South Africa and parts of the Middle East and works through a dedicated network of Stonhard affiliates throughout the rest of the world. Stonhard is part of RPM, a multi billion dollar company that combines their expansive resources and broad business base with smaller operating units to offer superior products, services, technologies and individuals.
